

EML2322L – Design and Manufacturing Laboratory
Personal Safety Consent and Acknowledgement Form

The health and safety of students and faculty in the Design and Manufacturing Laboratory is the staff's top priority. With that in mind, I have been specifically advised of the following:

1. I understand that participating in any activity in-person within the Design and Manufacturing Laboratory is voluntary and is a privilege that can be revoked.
2. Due to the in-person nature of the EML2322L training program, there are associated health risks when in the lab interacting with others. Health risks include working on dangerous machinery (if operated improperly) and potential exposure to pathogens.
3. The Design and Manufacturing Lab has put in place cleaning and sanitizing procedures with which **everyone** must abide, without exception.
4. Individuals within the lab are required to wear the proper personal protective equipment (PPE), which are not limited to but include: long pants, closed-toed shoes, approved face masks, safety glasses, and nitrile gloves (the latter two will be provided by the lab).
5. Everyone is subject to a temperature check upon entry. If there is an indication of a fever, the individual will be asked to leave.
6. It is the responsibility of each individual to practice safe health practices to mitigate their potential exposure outside of the lab out of consideration for those in the lab. If anyone encounters someone that has recently tested positive for COVID-19, it is the individual's responsibility to NOT come into the lab and instead to e-mail the lab staff of their health status. It is also the individual's responsibility to NOT come into the lab if (s)he shows symptoms of any illness.

By my signature on this form, I acknowledge and consent to interacting with the Design and Manufacturing Lab staff. My signature on this form is free from pressure or influence from any person or entity.
